

Environmental Policy

Chiltern Connections Ltd accepts its responsibilities in environmental matters and recognises that good environmental management must be an integral and fundamental part of our business.

The nature of our business means that we use hazardous substances on a daily basis and that we also produce hazardous waste. Despite this we are committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods by:

- complying with and exceeding the requirements of all relevant environmental legislation
- assessing the environmental effects of all business operations
- raise awareness, encourage participation and train employees
- expecting similar environmental standards from all suppliers and contractors
- actively promoting reuse and recycling internally to our staff and externally to our suppliers and customers
- conserving natural resources through increased energy efficiency and better water management
- managing our waste and reducing the use of hazardous substances as far as possible by researching and obtaining safer alternatives
- using recycled material where appropriate
- preventing and reducing pollution by implementing efficient control procedures to monitor and manage materials and processes that may impact on the environments
- making our environment policy available to interested parties
- continually seeking to improve environmental performance and achieve certification to a recognised standard e.g. ISO 14001
- monitoring progress and reviewing performance annually
